Additionally, for clinical internships only, the name of an agency designated licensed mental health professional must be provided. (See enclosed clinical internship policy.)
13. Letter from supervisor listing the Assessments the intern will be using and assurances that the intern will be properly trained to use the Assessments prior to implementing them.

Intern applicants are reminded that a Board approved internship is not a license to practice social work in Nevada. Interns must post, in a conspicuous place, the Board issued internship certificate which clearly identifies the applicant as an intern and the name of the intern supervisor. Pursuant to NAC 641B.240(2), an intern must use the title “Intern” in all communications with the Board and his or her respective clients.

The minimum length of an approved internship program is two years; the internship program should be completed within three years from the original approval date unless otherwise approved by the Board. Extensions are granted for good cause only. Internship programs are intended as post-graduate education emphasizing the need for practical on-the-job experience prior to licensure. The enclosed “Learning Objectives for Clinical and Independent Social Work Internships” is to be used by intern and supervisor as the foundation for the internship practice. Quarterly progress reports and assessment scales completed by the supervisor are designed to evaluate the intern’s ongoing competence for licensure. Samples of the intern’s work may be requested on a random basis. Supervisors and interns are required to meet for at least one hour every week.
